

The radar innovation with the electronically adjustable double field module

Merkur 2

Microwave motion detector
for automatic doors

Intelligent, precise, versatile

- **Optimal flow of persons:**
The only unique and homogenous radar field with SMD+ function detects the smallest movements
- **Versatile usable:**
Practical adjustments for any type of doors, inside and outside
- **Short commissioning time:**
Pre-programmed comfort settings and electronically adjustable dual field planar module
- **Energy-saving:**
Avoids involuntary openings of the door by means of direction recognition and blanking-out of cross traffic

Merkur 2

Microwave motion detector for automatic doors

The innovative all-rounder

Thanks to its extremely high versatility, Merkur 2 leads the way and can be used on virtually any type of automatic door. With its totally reliable detection, Merkur 2 provides a smooth flow of people and also ensures savings on energy and costs! The intelligent sensor system has an optional direction recognition and thereby makes sure that the door only opens when people are approaching or leaving. The door closes again immediately afterwards.

Hi-tech 'wonder' with dual field planar module

The second generation of Merkur is available with a radar field that is more symmetric and more sharply differentiated than before. Switching between wide or narrow field can be done fully electronically by remote control or by push-buttons on the sensor. Thus, Merkur 2 is adjusted and ready to operate extremely quickly.

Your benefits

Versatile usable for every situation

- Pre-programmed comfort settings for a rapid commissioning
- The most reliable detection with a clearly differentiated radar field
- Energy-saving by direction recognition
- Avoidance of involuntary door openings by blanking-out of cross
- Electronically switching between a wide and a narrow field
- SMD+ as a new detection field for movements of < 5 cm/s

Field characteristics

- Electronic field geometry settings options for a wide and narrow field (via remote control or via buttons at the detector)
- Can even be used with wide passage dimensions and high-level lights
- Mounting height up to 4 m

Optional plug-in screw terminal or RJ12 socket

Remote control for rapid commissioning and full range of settings

Radar module that is horizontally and vertically tiltable

Basic programming by using push-buttons on the sensor

Further accessories

High-quality accessories make the innovative Merkur 2 so versatile that it can be used in the most widely differing applications.

RegloBeam 2 remote control

Using this, the sensor can be rapidly configured and parameters can be individually adjusted for the respective situation

MIS ceiling installation kit

Using the MIS ceiling installation kit, the sensor can be discretely and almost invisibly built-in to the ceiling

MCAP rain and snow cover

The MCAP cover for external use protects the sensor against rain and snow

MCL semicircular adapter

The MCL adapter with its concave back provides a flat surface to mount the sensor on revolving and curved doors

Reliable in every application

Situation

Activation of sliding doors, pedestrians on the pavement

Solution

- Ensures an optimal flow of people with reliable activation
- Intelligent movement detection: only activated when people directly come towards the door. Ideal for access in passages/on pavements

Benefits

- No unnecessarily opening/prolonged opening time of the door thanks to direction recognition
- The depth of the field can be reduced to a minimum and still the sensor ensures an optimal flow of people
- Field size up to a width of 5.0 m
- No involuntary opening of the door due to blanking-out of cross traffic/people recognition

Situation

Activation of revolving doors

Solution

- With a special semicircular adapter, Merkur 2 can also be installed on revolving doors

Benefits

- Efficient blanking-out of cross traffic
- Small and precisely selectable detection field

Situation

Activation of swing doors

Solution

- The sensor for automatic doors even in the most confined spaces

Benefits

- Thanks to the blanking-out of cross traffic, the door leaf is not detected and so the door is not triggered
- Especially suitable for ceiling installation

Situation

Installation in elderly and disabled homes

Solution

- Merkur 2 with a specially pre-programmed comfort setting

Benefits

- Even the very slowest-moving persons (< 5 cm/s) and those in wheelchairs are safely detected with the new SMD+ field
- Almost stationary objects are recognised in the detection field. The door stays open until the person has safely passed through

Order details

Item no.	Description	
Merkur 2 Standard		
219184	Merkur 2 Without direction recognition Changeover contact, Plug-in screw terminal	
219190	Merkur 2 ES With direction recognition Changeover contact, Plug-in screw terminal	
219193	Merkur 2 ES.C With direction recognition Changeover contact, RJ12 socket	
Accessories		
292393	Bi-directional remote control RegloBeam 2	
213459	Cover Merkur black	
213462	Cover Merkur white	
247438	Cover Merkur silver	
212840	MIS – ceiling installation kit	
212837	MCAP – rain and snow cover	
212527	MCL 1.0 – semicircular adapter for Merkur 2 TRL 687 black Door diameter 2.0–3.6 m 175 × 40 × 5.4 mm (W × H × T)	
212528	MCL 2.0 – semicircular adapter for Merkur 2 TRL 687 black Door diameter 3.6–6.0 m 175 × 40 × 3.7 mm (W × H × T)	

Additional products

UniScan

Infrared presence detector for automatic swing doors and revolving doors in accordance with EN 16005 and DIN 18650

PrimeFamily A

The complete solution for activating and protecting sliding doors in accordance with EN 16005 and DIN 18650

Technical specifications

Technological specifications

Technology	Double field radar module (24.125 GHz)
Transmitter power	< 20 dBm
Size of narrow field (at 2.2 m)	Min. 0.7 × 0.6 m (W × D) Max. 2.7 × 1.9 m (W × D)
Size of wide field (at 2.2 m)	Min. 1.1 × 0.6 m (W × D) Max. 4.7 × 1.7 m (W × D)

Mechanical specifications

Material	Cover: PC Base plate: ABS
Dimensions	176 × 62 × 54 mm (W × H × D)
Weight (without cable)	150 g
Types of connections	Plug-in screw terminal or RJ12 plug

General electrical specifications

Voltage	12–36 VDC 12–28 VAC
Operating current	Approx. 50 mA at 24 VDC, 24 °C

Environmental conditions

Mounting height	Max. 4.0 m
Type of protection	IP54
Operating temperature	–20 °C up to +60 °C
Humidity	0 – 90 % rel., non-condensing

Standards

Immissions	EN 61000-6-1 EN 61000-6-2
Emissions	EN 61000-6-3 EN 61000-6-4

Specific specifications for Merkur 2 and Merkur 2 ES

Output	Potential-free changeover contact 48 VACDC 0.5 A AC / 1 A DC 60 VA / 30 W
